Neem

On the Indian subcontinent, Neem (Margosa) is one of the vastly seen herbs. It is indigenous to the whole country. Physicians since the ancient times have used this miraculous drug for various health related ailments. Almost every part of the herb has been tested to have medicinal properties.

Its seeds, fruits, bark and leaves all have proved to contain ingredients of health benefits. This Ayurvedic herb has been into use for a wide range of diseases since ages. Neem is a well-known blood purifier and one of the most powerful detoxifier. It is loaded with the amazing antibacterial, anti-fungal, anti-inflammatory, antiseptic and blood detoxification properties which help to treat the wide range of skin infections. The bitter taste of neem counteracts sweetness in the blood therefore useful in diabetes and skin infections.
